

By the present amendments, claims 10-21 have been amended to cover what Applicants believe to be the scope of the elected invention. Applicants expressly preserve their right to pursue the non-elected subject matter in divisional applications.

The Examiner's comments concerning Applicants' claims directed to compositions not being drawn to the invention originally elected are noted. While not acquiescing with the conclusion reached by the Examiner, but rather in a sincere attempt to advance prosecution, the claims have been amended to reflect a process for preparing compositions. The claims are fully supported throughout the specification. It is believed no new matter has been added.

Favorable consideration and early allowance to issue are respectfully requested.

Respectfully submitted,
NORRIS, McLAUGHLIN & MARCUS
